WORK EXPERIENCE

Explainable AI for Vehicle Fault Classification — BMW Group Munich, Jan 2025 - Current

Evaluating and implementing a range of explainable AI methods to optimise BMW's deep learning pipeline for vehicle fault classification. Improvements in both accuracy and efficiency have been achieved, with insights into key feature importances and explanations for model decisions aiding further development and cooperation with engineers.

AI for Space Standards Analysis — European Space Agency Noordwijk, Aug 2024 - Oct 2024

Built NLP-based machine learning tools to analyze and consolidate space mission technical standards. The tools from this project are now actively used by the ECSS (European Cooperation for Space Standardization) in its NextGen project to define the next generation of space standards.

FinTech Product Management & Technical Support — Adyen Amsterdam, Nov 2021 – Jul 2024

Led the deprecation of a legacy feature of the online payments platform, coordinating cross-functional teams to ensure a seamless transition. Improved technical documentation by applying topic extraction and sentiment analysis to internal communications. Supported merchants and internal teams with API configuration, Python automation, and resolution of complex payment integration issues.

PROJECTS

Investigating Visually Grounded Language Embeddings

Research project, probing the language embedding space of a pre-trained vision-and-language model to understand how incorporating visual information affects the language embeddings. Won 1st place at the UvA *Interpretability and Explainability in AI* conference in 2024.

Transformer for Summarisation

Bachelor thesis, implementing and training an encoder-decoder transformer model from scratch to generate abstracts of news articles under tight resource constraints.

EDUCATION

2023 - present	MSc Artificial Intelligence at Universiteit van Amsterdam	GPA: 8.3
2020 - 2023	BSc Artificial Intelligence at Vrije Universiteit Amsterdam	GPA: 8.4
2019 - 2020	Bachelor of Information Technology at Inholland Haarlem	
2016 - 2019	International Baccalaureate at International School of the Hague	

PUBLICATIONS

Sauter, Adrian et al. (2024). ““Studying How to Efficiently and Effectively Guide Models with Explanations” - A Reproducibility Study”. In: *Transactions on Machine Learning Research*. ISSN: 2835-8856. URL: <https://openreview.net/forum?id=9ZzASCVhDF>.

SKILLS

Languages English (native), German (native), Dutch (native), Russian (elementary)
Technology Python, PyTorch, Sklearn, Scipy, Numpy, Pandas, C#, Java, SQL, Git, Linux
